No.217, Barani Street,12 Ward, South Okkalapa Township, Yangon

PROFESSIONAL SUMMARY

Results-driven Junior Developer with hands-on experience building scalable web applications using React, Next.js, Node.js, and PostgreSQL. Skilled in developing secure, role-based access control systems, integrating RESTful APIs, and delivering production-ready solutions. Strong focus on clean architecture, responsive design, and performance optimization. Passionate about building impactful software while continuously expanding technical expertise.

WORK EXPERIENCES

Junior Developer – Connected Group (Yangon) Oct 2025 – Present

- Built reusable React components and admin dashboards for SaaS platforms.
- Implemented JWT authentication and role-based access systems.
- Integrated RESTful APIs and coordinated with backend teams to ensure reliable data exchange.
- Supported production deployments, resolved incidents, and maintained high system availability.
- Collaborated with designers and backend developers to deliver features on schedule.

Full Stack Developer – MMSIT (Yangon) Oct 2024 – Dec 2025
1year-6months

- Built full-stack web applications using React, Next.js, and Node.js.
 - Designed reusable UI components with Tailwind CSS and optimized frontend performance.
 - Developed authentication systems and secure REST API integrations.
 - Implemented CRUD functionality and managed relational/non-relational databases (PostgreSQL, MongoDB).
 - Deployed applications to Vercel and VPS environments with Git-based collaboration workflows.
-
-

Business Development Executive- Quibit Jan 2026 – Present(Part-Time)

- Generated leads through LinkedIn and direct outreach.
 - Identified software development and outsourcing opportunities.
 - Engaged with startups and technology companies to explore partnerships.
 - Coordinated project requirements between clients and development teams.
 - Assisted in project estimation, proposal preparation, and delivery planning.
 - Managed prospect follow-ups and client communications.
 - Supported business growth through strategic partnership development.
-
-

EDUCATION

Space International College, Vietnam	Freshman, Software Engineering (2025 – Mar 2026)
Dagon University	Chemistry (2023 – 2024)

SKILLS

React, Next.js, Node.js, Express,Python, Fastapi, Nestjs, Tanstack Query, PostgreSQL, MongoDB,SupaBase Tailwind CSS, Git, Vercel, TypeScript, REST APIs, JWT, Zustand, React Native, Expo, Prisma, Vue, React Router DOM, SweetAlert2, React Hot Toast

LANGUAGES

Japanese (Proficient, n3 passed), English (Proficient)

SOCIALS

[Linkedin](#) Viber - 09 982094919 Zalo - (+84) 389 270 846

KEY PROJECT EXPERIENCES

Quibit App

Role: Business Development & Project Coordination

Description

Worked closely with clients and development teams to gather business requirements, coordinate project execution, and ensure successful feature delivery.

Responsibilities

- Gathered business requirements from stakeholders.
- Prepared functional documentation.
- Coordinated communication between clients and developers.
- Assisted with sprint planning and feature prioritization.
- Tracked project progress and delivery timelines.
- Participated in testing and requirement validation.

Tools

Notion

Figma

Google Workspace

Slack

Email Management System – Connected Group

Role: FullStack Developer

Description

Developed an internal email management system that streamlined organizational communication by providing secure email workflows, notification services, and user management.

Responsibilities

- Developed frontend interfaces for email management.
- Built backend APIs for email processing.
- Integrated SMTP/email services.
- Implemented user authentication and permission management.
- Created inbox, sent mail, and notification modules.
- Optimized backend performance and database operations.
- Maintained secure communication between frontend and backend.

Technologies

Frontend

- React.js
- Next.js
- Tailwind CSS

Backend

- FastAPI / Node.js
- REST API

Database

- PostgreSQL / MySQL

Other

- SMTP
- Email Notification
- JWT Authentication
- Docker
- Git

Condominium Management System – Connected Group

Role: FullStack Developer

Description

Developed a condominium management platform that enabled administrators and residents to manage properties, maintenance requests, resident information, and daily operations efficiently.

Responsibilities

- Developed frontend dashboards for administrators.
- Built backend APIs for condominium management.
- Implemented resident and property management modules.
- Developed maintenance request and tracking features.

- Integrated authentication and role-based permissions.
- Designed relational database structures.
- Improved system performance and application reliability.

Technologies

Frontend

- React.js
- Next.js
- Tailwind CSS

Backend

- FastAPI / Node.js
- REST API

Database

- PostgreSQL
- MySQL

Tools

- Docker
- Git
- Postman

Client Project – Su Latt Phy

Role: Frontend Developer

Description

Developed a responsive client-facing application and administrative dashboard while collaborating closely with backend developers to integrate business functionalities.

Responsibilities

- Built responsive user interfaces.
- Developed reusable React components.
- Integrated REST APIs.
- Implemented state management.
- Improved UI/UX based on client feedback.
- Fixed frontend bugs and optimized performance.

Technologies

- React.js
- Next.js
- TypeScript
- Tailwind CSS
- REST API
- Zustand
- Git

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at your company.

I have experience developing modern web applications with React, Next.js, JavaScript, TypeScript, REST APIs, and SQL databases. Through professional and personal projects, I have built full-stack applications from frontend to backend, integrated third-party APIs, designed responsive user interfaces, implemented authentication systems, developed real-time features, and collaborated throughout the software development lifecycle.

My recent experience includes developing enterprise applications such as a company website, an email management system, and a condominium management system, where I worked on application architecture, API development, database integration, business logic implementation, and performance optimization. These projects strengthened my problem-solving skills and my ability to deliver reliable, scalable software.

Beyond my current experience, I am continuously expanding my technical knowledge in backend development, Go (Golang), cloud computing, containerization, CI/CD, and DevOps practices. I enjoy learning new technologies and applying them to build efficient, maintainable, and high-quality software solutions.

I am a motivated and fast learner with strong analytical and communication skills. I enjoy working collaboratively, solving technical challenges, and continuously improving both my technical expertise and development practices. I am confident that my combination of practical experience, adaptability, and enthusiasm for learning would allow me to contribute effectively to your engineering team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills, experience, and passion for software development align with your team's goals. I look forward to hearing from you.

Sincerely,
Khant Min Htut
